

**Supplementary Table 1.** Characteristics of patient's fluid deresuscitation outcome

Deresuscitation characteristics	Value
Need for diuretics	59 (59.0)
Need for RRT	18 (18.0)
Median time from ICU admission to diuretic therapy (n=59, day)	2 (1.0–4.0)
Median time from ICU admission to renal replacement therapy (n=18, day)	4 (2.0–9.0)
Median time from ICU admission to the need for deresuscitation by diuretics or RRT (n=61, day)	2 (1.0–3.0)

Values are presented as number (%) or median (interquartile range).

RRT: renal replacement therapy; ICU: intensive care unit.
